Standard Form 298 (Rev. 8-98)  
Prescribed by ANSI Std. Z39-18

# RD-681A/UNH RECORDER- REPRODUCER

CODE 40003

## DESCRIPTION

### WHY HAVE A VOICE RECORDER?

**Voice recorders provide a precise and verbatim log of internal and external radio voice communications. This information can be invaluable for:**

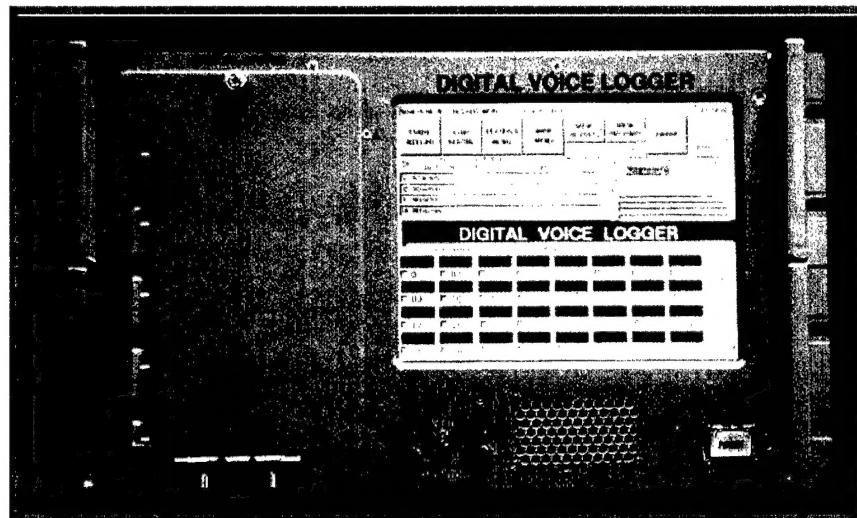

- Immediate playback of transmissions during combat or emergency situations to determine exact message received or transmitted.

- Determining if proper operational & radio telephone procedures are being followed.

- Conducting incident or accident analysis.

- Providing court-acceptable records.

- The RD-681A/UNH is a commercial-off-the-shelf (COTS), PC-based, state-of-the-art, voice recording system that automatically records when voice signals are present at any one of 32 input channels. It operates in the Windows NT™ environment & can record 32 audio channels (expandable to 80). Digital interface options are available. The system can be housed in a standard EIA cabinet with a 19-inch rack configuration.
- A major advantage of the RD-681A/UNH is that audio recording need not be interrupted to provide simultaneous & synchronized playback of four channels of audio. This allows recording to continue while the operator plays back previously recorded transmissions.
- Instant recall on monitored channels is available via a single key action. This feature facilitates "hard to hear" or "hard to understand" distress calls.
- Voice data is digitized by the processor & stored on rewritable magneto-optical disks. Each disk can record up to 460 hours of voice transmissions. Commands & operator input may be given to the computer via touch screen or keyboard.
- Since the system does not contain a magnetic hard disk drive, communications security is obtained when the magneto-optical disks containing the recorded data are ejected. To ensure rigid quality control standards are maintained, each RD-681A/UNH is subjected to a total system end-to-end test.

## FEATURES

- Meets communications security requirements for shipping.
- Digital interface options available (NTDS).
- Signal recognition circuitry records only voice signals.
- Network connection for remote monitoring & control.
- Current IRIG-B/HAVEQUICK time format & time-of-day synchronization.
- Multi-channel voice data archiving, including automatic switching of recording drives in the event of drive or disk failure or when the recording disk is full.
- Remote & internal alarm to warn that the disk is in danger of becoming full or to warn of media error.
- CD-ROM computer-based training.
- Journal of all magneto-optical disks with data & all recorded audio time tagged for easy retrieval.
- Flat panel display:
  - Will not implode on impact, making it safer for an operator in a shipboard environment.
  - Less EMI susceptible than CRT displays.
  - Bright & viewable off axis.
- Password protected to prevent unauthorized removal or erasure of magneto-optical disks.
- System self-test diagnostics & operator help menu.
- Built-in internal speaker.

## SPECIFICATIONS

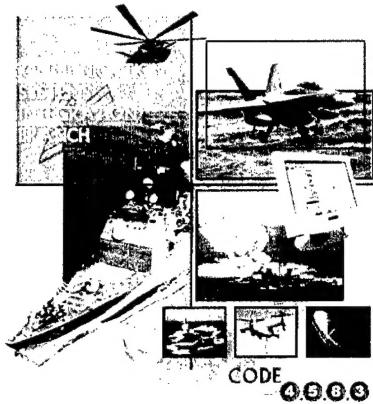

<b>Nomenclature:</b>	RD-681A/UNH Recorder-Reproducer
<b>NSN:</b>	TBD
<b>RIC:</b>	TBD
<b>Operating Sys:</b>	Windows NT™
<b>Display:</b>	Color 10" (diagonal)
<b>Keyboard:</b>	80 key IBM-compatible
<b>Drives:</b>	5.2 GB magneto-optical 1 Priority 2 Archive 1 Current
<b>Storage/disk:</b>	5.2 GB magneto-optical 5.2 GB magneto-optical 460 hours at 4:1 comp.
<b>Compression:</b>	5.2 GB magneto-optical 4:1 ADPCM/5:1 ADPCM
<b>Playback:</b>	40 ms Any of 32 channels
<b>Shock:</b>	Channel, date or time
<b>Vibration:</b>	Up to 4 channels real-time
<b>Alarm:</b>	MIL-S-901 Grade B (pending) MIL-STD-167
<b>Impedance:</b>	Internal/external Dry contacts
<b>Isolation:</b>	Input: 25 kOhms Output: As low as 50 ohms
<b>Outputs:</b>	>80 dB between channels
<b>Audio:</b>	0.5 W
<b>Headphones:</b>	8-600 ohms
<b>Line:</b>	0 dBm
<b>Power:</b>	90 to 130/180 to 250 47 to 63 Hz 300 W
<b>Temperature:</b>	0 to 45 degrees C -40 to 60 degrees C 0 to 60 degrees C
<b>Operating</b>	0 to 45 degrees C
<b>Shipping</b>	-40 to 60 degrees C
<b>Storage</b>	0 to 60 degrees C
<b>Relative Humidity:</b>	20 - 80% non-condensing
<b>Weight:</b>	50 lbs.
<b>Height:</b>	10.5"
<b>Width:</b>	19.125"
<b>Depth:</b>	17.5" w/o handles 19.375" with handles

## WHY HAVE A VOICE RECODER?

*Voice recorders provide a precise and verbatim log of internal and external radio voice communications. This information can be invaluable for:*

*- Immediate playback of transmissions during combat or emergency situations to determine exact message received or transmitted.*

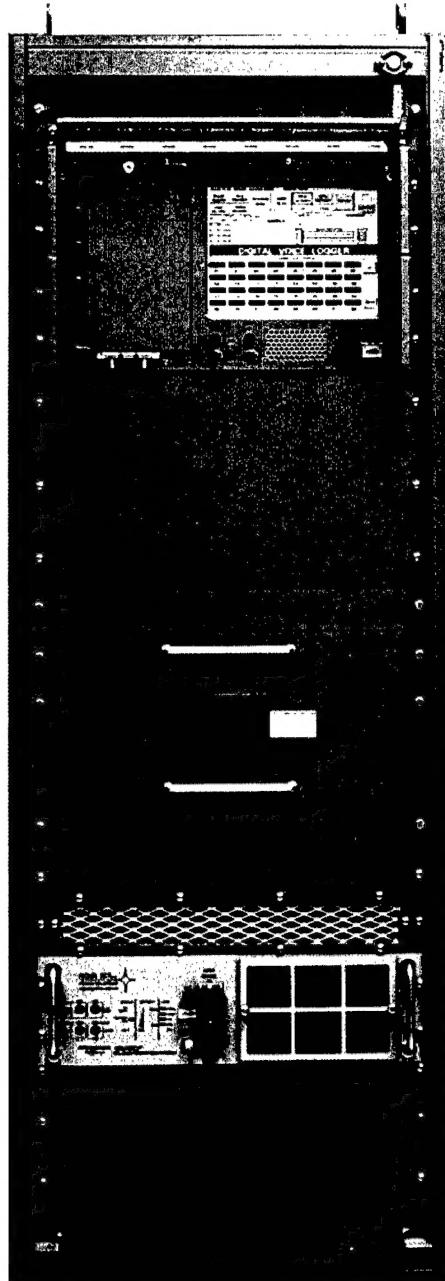

*- Determining if proper operational & radio telephone procedures are being followed.*

*- Conducting incident or accident analysis.*

*- Providing court-acceptable records.*

## DESCRIPTION

- The RD-674B/UNH was developed to replace the RD-379/390 recorder & RP-214 reproducer, which are no longer manufactured or supported by industry sources & are obsolete, unreliable, & costly to maintain. The RD-674B/UNH is a commercial-off-the-shelf (COTS), PC-based, state-of-the-art, voice recording system that automatically records when voice signals are present at any one of 32 input channels. It operates in the Windows NT™ environment & can record 32 audio channels (expandable to 80). Digital interface options are available. The system can be housed in a standard EIA cabinet with a 19-inch rack configuration.
- A major advantage of the RD-674B/UNH is that audio recording need not be interrupted to provide simultaneous & synchronized playback of four channels of audio. This allows recording to continue while the operator plays back previously recorded transmissions.
- Instant recall on monitored channels is available via a single key action. This feature facilitates "hard to hear" or "hard to understand" distress calls.
- Voice data is digitized by the processor & stored on rewritable magneto-optical disks. Each disk can record up to 460 hours of voice transmissions. Commands & operator input may be given to the computer via a touch screen or a keyboard.
- Since the system does not contain a magnetic hard disk drive, communications security is assured when the magneto-optical disks containing the recorded data are ejected. To ensure rigid quality control standards are maintained, each RD-674B/UNH is subjected to a total system end-to-end test.

## FEATURES

- Meets communications security requirements for shipping.
- Digital interface options available (NTDS).
- Signal recognition circuitry records only voice signals.
- Network connection for remote monitoring & control.
- Current IRIG-B/HAVEQUICK time format & time-of-day synchronization.
- Multi-channel voice data archiving, including automatic switching of recording drives in the event of drive or disk failure or when the recording disk is full.
- Remote & internal alarm to warn that the disk is in danger of becoming full or warn of media error.
- CD-ROM computer-based training.
- A disk storage drawer to store up to 81 magneto-optical disks.
- Navy Center-approved uninterruptible power supply (UPS), providing power conditioning & up to one hour of standby power.
- Journal of all magneto-optical disks with data & all recorded audio time tagged for easy retrieval.
- Flat panel display:
  - Will not implode on impact, making it safer for an operator in a shipboard environment.
  - Less EMI susceptible than CRT displays.
  - Bright & viewable off axis.
- Password protected to prevent unauthorized removal or erasure of magneto-optical disks.
- System self-test diagnostics & operator help menu.
- Built-in internal speaker.
